

## CLOVER SAFE #5

# ALL-TERRAIN VEHICLE SAFETY

*Photograph Courtesy of  
Sierra Foothill REC*

According to data available from the U. S. Consumer Product Safety Commission, a total of about 50,000 youth aged 18 years and younger were treated in hospitals for all-terrain vehicle injuries during 2005. Broken bones, bruises, and cuts were the most common types of injuries. All-terrain vehicles are regulated by the California Vehicle Code (CVC), Sections 38000 through 38506. For additional information about ATV safety, go to the Clover Safe note at: <http://ucanr.org/cloversafe>.

Clover Safe Notes are prepared by the UC ANR Office of Environmental Health & Safety, in support of the Statewide 4-H Youth Development Program.
