

CLOVER SAFE #46

CANOEING SAFETY

Information available from the United States Coast Guard indicates a total of 49 people died in canoeing accidents during 2005. Of this total, 40 of the deaths were due to drownings and Personal Flotation Devices (PFDs) were not worn in 37 (93%) of these cases. For additional information about canoeing safety, go to the Clover Safe note at: <http://ucanr.org/cloversafe>.
