

CLOVER SAFE #63

PLANTS POISONOUS TO 4-H ANIMALS

Caring for animals requires feeding them a healthy diet and avoiding foods that may be potentially harmful or toxic. 4-H volunteers and members should regularly inspect animal pens, pastures, and purchased or cut hay or other fodder for hazardous plants and take steps to prevent their animal(s) from coming into contact with these types of plants.

For additional information about plants poisonous to 4-H animals, go to the Clover Safe note at:
<http://ucanr.org/cloversafe>.

Clover Safe Notes are prepared by the UC ANR Office of Environmental Health & Safety, in support of the Statewide 4-H Youth Development Program.
